Professional Experience

Frontend Developer   2023.02 – 2023.04
Artamedicus ⬈   Astana, Kazakhstan
Technologies used: Nextjs, Twilio API, Recoil, Vercel, Vercel Analytics
- Developed website with Nextjs and styled them with CSS modules, for provided design specifications.
- Integrated Twilio API enabling website visitors to send messages from the form directly to designated phone number.
- Deployed the NextJs application on Vercel with a custom domain acquired from Vercel
- Vercel's Speed Insights equal to 100 percent
- Improved Search Engine Optimization and attained a perfect Lighthouse score of 100 in the SEO section for a project.

Projects

Soundbase ⬈
Full stack e-commerce web application listing vinyl collections and allowing users to register and purchase the products
Technologies used: Reactjs, Nextjs, Typescript, MongoDB, Recoil, Next-Auth, Stripe API
- Developed an e-commerce platform using React, and Next.js with a Typescript.
- Managed the database using MongoDB Atlas, ensuring efficient storage of vinyl records, artists, and user information.
- Implemented authentication with JWT and Next-Auth
- Integrated Stripe API to enable payment transactions.
- Utilized Recoil for efficient state management of the Cart, enhancing overall application performance.
- implemented caching with the client's local storage memory to prevent unnecessary API calls
- Utilised Static Site Generation, Server-Side Rendering, and Incremental Static Generation for various use cases involving dedicated pages.

Real time chat ⬈
A real-time chatting web application built with web sockets and Google Authentication
Technologies used: Reactjs, Nextjs, Typescript, Redis, Next-Auth, Web-Sockets
- Developed a real-time chat application using React.js, Next.js, and Typescript.
- Implemented web socket for real-time communication
- Utilized Redis for efficient data storage and optimizing project performance.

Drag & Drop Kanban Todo list ⬈
Technologies used: Reactjs, React- Beautiful-dnd, Redux,
- Implemented drag-and-drop functionality, allowing users to organize and prioritize tasks considering UI changes.
- Utilized Redux as a state management tool to provide a dark theme of application

Skills

Programming languages *(Javascript, Typescript, Java, Python)*,
Development Tools *(Github, Vercel, Git, Figma, PNPM/Yarn/NPM)*,
Frameworks/others: *(Reactjs, Nextjs, Nodejs, Tailwind CSS, Recoil, Redux, Redux Toolkit, MongoDB)*

Education

Sejong University   2022 – present
Computer Science/Engineering   Seoul, South Korea
Relevant Courses: Web Programming, Software Engineering, Computer Networks,
Discrete Math, Problem Solving and Lab: Java, Introduction to programming languages
GPA: 4.32/4.5

Certificates

- Understanding Typescript ⬈
- 100 Days Of Code - 2024 Web Development Bootcamp ⬈

Languages

English | Korean | Russian | Kazakh
